

HYTANBIO

ORAL DISSOLVING FILM DEVELOPMENT PROFILE

Spearmint Oral Care Films

Development status: concept for project-specific feasibility and specification review.

Ingredient direction

Spearmint flavor system

Technical focus

Balance refreshing aroma, sweetness and the dissolving experience without implying treatment of dental disease.

Format and customization

Product format	Thin, flexible oral dissolving film
Film dimensions / thickness	Confirmed after loading and sensory assessment
Final active content	Confirmed through formulation and analytical review
Flavor and appearance	Selected against the complete formulation
Packaging	Individual barrier sachets; optional branded cartons
Collaboration models	OEM, ODM, CRO and CDMO scopes available for discussion
MOQ / timing / pricing	Quoted after formula, pack format and volume review
Documentation	Agreed specifications and available batch-wise records

Review before commercialization

This profile does not define a final formula, consumer dose, shelf life or approved medical claim. Ingredient eligibility, intended population, finished-product safety, stability and label claims require review for the destination market. Illustrative product imagery is not a batch record.
